MICHAEL RUIZ

ABOUT
BEER ADVISOR

Beer advisor is an application designed for the beer connoisseur. It allows you to map out an efficient route to view all your brewery selections.

The way it works is it asks the user to search for breweries based on a search query. The user then can add breweries to their list. The user then will be prompted to add a starting and ending location. When the user clicks "map it" it will display the most efficient route on a map.

BEER IS OUR PASSION

Drink responsibly

User Story

As a beer connoisseur
I want to locate breweries, related to my search query
So I can view the shortest distance to visit them
